

Wainlux K6 Mini Laser Engraving Machines CNC Laser Engraver DIY Logo Marking Printer Cutting Wood Glass 3D Laser Engraver

Model: K6

Material: ABS

Control Model: PWM

Operating System: WIN-7/8/10; IOS, Android

Applicable Materials: Paper/Wood chips/Plastic/Stone/LeathWare/Cloth

Interface specification: 3W Laser

Wavelength: 450nm

Working Area: 80*80mm

Total power: 17W

Output Optical Power: 3W

Graphic Format Supported: JPG/JPEG/BMP/TIF/GIF

Image Size: 0.05mm

Machine Supply Voltage: 12V 2A

Control Line Installation Method: There is not need to install the machine.

Best Focus Range: 30-50mm

Best Focus Length: 100mm

Safety Warning: There has warning signs, If the machine has moved or overturns, the laser will be turned off automatically.

Recommended application machine: Computer operated engraving software, mobile phone app operating engraving software

Product size (L x W x H): 172 x 172 x 162mm

1.Movement Protection: Using a sensitive 3-axis accelerometer for motion deception, it will notice an accidental movement during operating, and Wainlux will shut down immediately.

2.Small Size. Powerful Laser.

3.The mobile phone or computer can work continuously in an offline state, and at the same time, the last pattern can be memorized and manually engraved. By including a One-Click Button for offline engraving, you can set your Wainlux to engrave without a constant connection.

4.Thanks to its innovative rail and baseless design, the Wainlux can engrave objects of any size so long as they are kept horizontally stable under the laser's XY axis.

5.Engrave Your Design On Almost Any Object: Metal Spray Paint, Leather, Wood, Bamboo, Plastic, Paper.

6.Maximum Customization,Durable Design.
